

### Cross in a Square

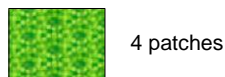

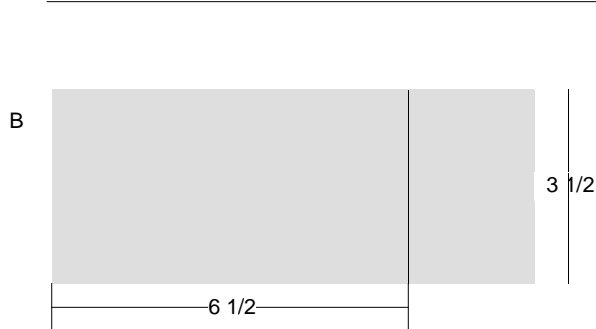

Key Block (8/50 actual size)

Cutting Diagrams

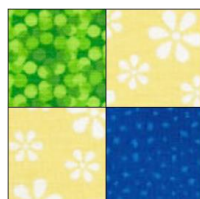

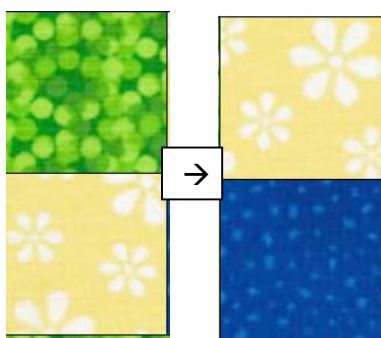

Patch Count

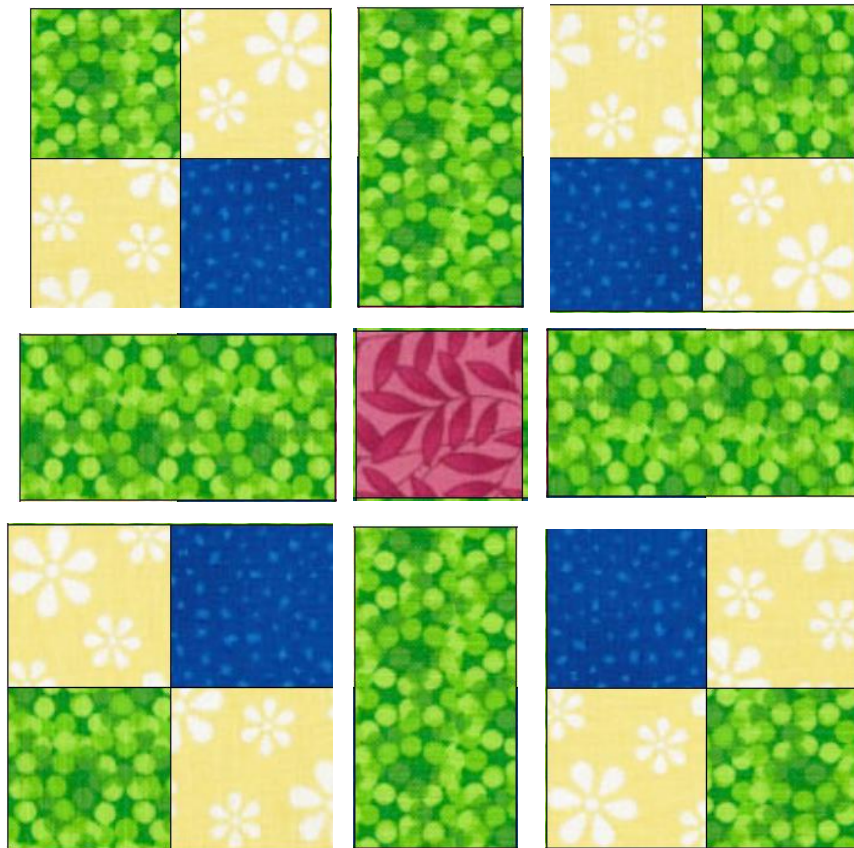

Instructions for "Cross in a Square" as 15.000 by 15.000 (inches) block, printed from EQ7!

Strip piecing alternative for 4-patch pieces:

CUT strips (one green, one blue, two yellow) 3 1/2 inches by 14 inches. Sew one yellow to the blue and one to the green. CUT 3 1/2 inch segments and sew the segments together as shown to make four 4-patch segments.

CUT a green strip 3 ½ inches by 26 inches. Cut it every 6 ½ inches to make 4 segments. CUT the red 3 ½ by 3 ½ inches. Arrange the segments as shown and sew together.

That was easy.

Now what if...

I cut it in half vertically and rotated? Or both directions? If you are going to explore these options, be sure to add ½ inch per cut to the center pieces to allow for the extra seams and keep the original block finished size.
