

July 20<sup>th</sup>, 2018 is the 49<sup>th</sup> Anniversary of NASA's manned Moon Landing so get your Space and Astronaut on!

This month we tantalize you with a star block (pieced) and a rocket block (applique). Our color scheme is the usual red, white and blue. But what about adding yellow for rocket flames, or star block pieces. How about a scrappy rocket; they don't have to be all aluminum if you don't want. And any applique technique(s) of your preference is accepted.

Go where no quilter has gone before and make any star or rocket block (applique, pieced, foundation) as long as it's 12.5" unfinished, or put on a background of 13" or larger (so we can cut it down)
